                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       1 (bases 1 to 20)
1 (bases 1 to 20)
1 (kmets,R., Anderson,K.L., Dean,M., Leppert,M., Lewis,R.A.,
Li,Y., Luppeki,J.R., Nathans,J., Rattner,A., Shroyer,N.F., Singh,N.,
Smallwood,P. and Sun,H.
Smallwood,P. and sun, acid sequences for ATP-binding cassette
transporter and methods of screening for agents that modify
ATP-binding cassette transporter
patent: US 6713300-A 114 30-MAR-2004;
Location/Qualifiers
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         N
                                                                                                                                                                                                    Boekenkamp,D., Hoppe,H.U. and Burgstaller,P. Detection system for separating constituents production and use of the same Patent: WO 0071747-A 35 30-NOV-2000; Aventis Research & Technologies GmbH & Co. KC
                                                                                                                                                                                                                                                                                                     synthetic construct synthetic construct
                                                                                                                                                                                                                                                                                                                                                          Sequence 35 from Patent AX048436
                                                                                                                                                                                                                                                                                                                                                                                                                                                          σ
